A17 IMS Connector for Java: A Perspective on Web-Enabling Your IMS Transactions
Haley Fung

**VIEW** 

This presentation provides a high-level overview on using IMS Connector for Java to access IMS transactions from the Web. The basic concepts and features of IMS Connector for Java are presented, with an eye towards helping you understand how you can use IMS Connector for Java in your shop. This presentation also introduces the latest updates to IMS Connector including Local Option and J2EE Connector Architecture technology.
