Session Abstract

A19   The World of Java from an IMS Perspective
Ken Blackman

JAVA, JVM, applets, servlets, JavaBeans, J2EE, VisualAge – Java is everywhere! Just tracking the terminology is challenging enough. How do these evolving technologies and products relate to your IMS application environ-ments? This presentation describes the latest developments in IMS that enable the Java world to be used with your IMS applications and data. Come to this presentation to learn about using Java for accessing existing IMS applications and building new IMS applications. If you are an IMS DBA, application developer, system program-mer or technical support person, then this presentation will help you understand how IMS is evolving to embrace these technologies and enabling you to extend your IMS systems.
