B05 What's New with IMS Since General Availability of IMS V7?

Tom Ramey

VIEW

Those IMS Developers are at it again! Come hear new announcements and enhancements relating to IMS since the Version 7 general availability announcement in October 2000. This session covers enhancements made to IMS through the service process like 64 bit support, HALDB improvements, enhancements relating to Java as an IMS application programming language, and others. New or enhanced IMS e-business Tools and IMS Data Management Tools since the last announcement are also discussed.
