B08 Fast Path DEDB Fundamentals

Bill Stillwell

VIEW

New to fast path? Confused by the differences between DEDBs and HDAM? Want to know how DEDBs really work? Come to this session and learn the basics of the Fast Path Data Entry Database. Topics include the area concept, record structure, space management, buffer management, locking, logging, commit processing, and output thread processing. This session is a must for those who find themselves thrust into the fast path arena without any prior experience.
