B12 CICS and e-business on z/OS: Web-Enabling Existing and New CICS/IMS Applications

John Graham

VIEW

Many S/390 customers happily run CICS and IMS together along other middleware on their enterprise servers. With the move into e-business, what role does CICS play today and in the future? This session takes a look at CICS's e-business strategy, how we've succeeded with it to date, and most importantly what CICS is going to do over the next few years to enable its customers to continue to win with that strategy. We will also look at IBM's larger strategies and how CICS plays a core role in IBM's strategic solutions, in partnership with products including WebSphere Application Server and IMS.
