C04 Accessing MQSeries Messages from IMS Applications at Telcordia (double session)
Steve Nathan

VIEW

There are a great number of items which must be considered when accessing MQSeries messages from IMS applications. This session presents the details related to how IMS applications can communicate with MQSeries and describes Telecordia's implementation experiences. The session also discusses both the MQSeries API and the IMS OTMA Bridge. This session also explores the IMS–MQSeries interface and how it is being used at Telcordia.
