#### S31 Making DBRC Work for You

Rick Long

## VIEW

This session provides practical examples of how to get DBRC to perform some basic tasks required by the DBA. It is gives the DBA ideas about how to creatively use DBRC commands to perform work they might otherwise have to do manually. There is also question and answer time included in the session. The functions that are discussed includes:

Creating VSAM define commands for DBRC registered databases Creating MDA definitions for DBRC registered databases Creating INIT.DB commands to reregister databases in a different RECON Creating NOTIFY.IC commands to register IC information in another RECON Creating a batch unit test environment for HALDB databases

. . . . . . . . . . . .
