S67 IMS e-business Offering Performance Test Results

Sinmei DeGrange

VIEW

IMS Version 7 became generally available last October. Its leading-edge functions help IBM customers meet the demands of an e-business world. IMS e-business offerings, IMS Connect, IMS Connector for Java and IMS Version 7 Java application support, provide production-ready, high-performance access to IMS. This session discusses the recent performance test results collected in IBM's Silicon Valley Lab.
