## S69 Tuning HDAM Databases

Kyle Lindvall

Are you getting the most out of your HDAM databases? Are you concerned that the DBD randomizing parameters for your databases may not be giving you the best in performance? This topic provides you with an understanding of HDAM tuning, examines the DBD choices available for HDAM databases and datasets. It discusses the effect of each and how they interact with one another. Recommendations and guidelines are also provided for the design of your database.
