Session Abstract

E07   What's New with IMS Since General Availability of IMS V7?
Barbara Klein, IBM Silicon Valley Laboratory

Significant IMS enhancements have been announced since the initial general availability of IMS V7. These are being provided through the service process on IMS and/or with new or enhanced IMS Tools. This presentation gives a brief overview of what was delivered initially with IMS V7 and IMS Tools in October of 2000. It then discusses the enhancements provided in 2001, along with new enhancements provided and/or planned for 2002: where we are now and where we are going with XML for IMS, followed by a pre-view of what's to come.
