

E19 IMS Connector for Java: Details You Need to Know!
Judith Hill, IBM Silicon Valley Laboratory

Come to this session and dive into the depths of IMS Connector for Java. Learn about the implementation of IMS Connector for Java as a Java 2 Enterprise Edition (J2EE) Connector Architecture resource adapter and the various common application models used with IMS Connector for Java. Learn how to configure IMS Connector for Java with IMS Connect and WebSphere Application Server with an insight on connection and security management, and learn about migration from Common Connector Framework and VisualAge for Java. Finally, learn some useful hints and tips on problem analysis and more.

Before attending this session, you should understand basic concepts related to IMS Connector for Java, which can be obtained by attending session E18, Web Enabling IMS Transactions with IMS Connector for Java, or by prior experience with IMS Connector for Java.
