Session Abstract

E37   IMS/OTMA Security Considerations
Lonnie Coleman, IBM Dallas Advanced Technical Support

Attend this session for an understanding of the OTMA security levels NONE, CHECK, FULL, and PROFILE. Also presented are: considerations for use of each of the OTMA security levels; IMS execution parameter specifications and commands to activate/deactivate OTMA security; and sample RACF definitions to secure client-bids, IMS commands, and IMS transactions. In addition, the presentation also lists security enhancements that are planned for IMS/OTMA.
