

**TOC****INDEX****VIEW****E38 IMS Connect Security Considerations***Lonnie Coleman, IBM Dallas Advanced Technical Support*

This session provides a technical overview of: IMS Connect security capabilities; considerations for using a user-coded security exit routine, such as IMSLSECX, in lieu of IMS Connect security; RACF facilities that may be used to enhance security for IMS Connect users; and security enhancements that are planned for IMS Connect.

Before attending this session, you should understand basic IMS/OTMA security concepts, which can be obtained by attending session E37, IMS/OTMA Security Considerations, or by prior training or experience.
