

**TOC****INDEX****VIEW****E42 Newly Announced IMS Tools**  
*Marc Spooner, IBM Silicon Valley Laboratory*

Have you heard about the recent Data Management Tools announcement? Join Marc to learn details about the three new IMS Tools that play major roles in the announcement. If you're a Database Administrator, you'll learn new ways we've improved and automated some of your daily tasks. If you're a System Programmer, you'll hear about new performance enhancements that provide modeling facilities and the capability to run 'what if' scenarios to assist in making informed decisions about your databases. And for Application Programmers, we've got enhancements for testing and checking application programs and interfaces. You definitely don't want to miss this session. Get the very latest and greatest information on the new IMS Tools.
