E44 IMS Database Reorganization: Yesterday, Today and Tomorrow Helene Lyon, IMS Software Specialist, IBM France

VIEW

The process of performing an IMS Database Reorganization is continuing to change as batch windows shrink and you move closer to 7 X 24 operations. The evolution of the tools/utilities available from IBM are reflective of this change. This presentation puts in perspective the different solutions to perform Full Function database reorganizations with currently available, recently announced and potential future tools/utilities.
