E52   V8 Implementing User Written Automation with the Operations Manager Interface
Pedro Vera, IBM Silicon Valley Laboratory

This session teaches you the basics of writing your own programs to issue IMS operator commands.
It also provides details of writing REXX programs to issue IMS operator commands.

Before attending this session, you should understand basic IMS Single Point of Control concepts, which
can be obtained by attending session E51, V8 Introducing IMS Single Point of Control, or by prior study.
