

A Business Partner Solution for Cross Industry

Business Intelligence for Project-Driven Enterprises

Deltek

Business Performance Management (BPM)

Solution Description

Business performance management (BPM) is a process that enables organizations to strengthen the alignment of strategic goals with day-to-day operations using key performance indicators (KPIs) across business functions. BPM streamlines organizations information to facilitate effective and focused decision-making. BPM creates a “single version of the truth” by standardizing how information is collected and presented.

Deltek Business Performance Management is a Web-based business intelligence and planning solution designed specifically for project-driven enterprises and government contractors. It provides you with access to the information you need, when you need it, in order to make comprehensive and effective business decisions.

Features & Benefits

- **Make Informed Decisions to Meet Your Business Goals**
With intelligent, self-service reporting and analytics, your employees can make informed, proactive decisions and keep your company profitable.
- **Standardize Data on a Single Business Intelligence Platform**
Deltek Business Performance Management provides a complete view of everything project and business-related by pulling data from various sources including projects, financials, operations, procurement, labor and more.
- **Align your Budgeting and Planning Strategy**
Enterprise planning with Deltek BPM eliminates spreadsheet-based systems and allows for quick turnaround for budgets and forecasts – reducing the time spent preparing and increasing the time spent analyzing and executing the plan.
- **Lower Total Cost of Ownership**
Deltek Business Performance Management can lower your total cost of ownership. With self-service reporting, your employees can create their own customized reports with minimal training and without the help of IT. Deltek BPM also provides role-based security, allowing companies to give a broader set of users access to financial and operational information without compromising security. This provides faster turnaround to end-user requests, frees up IT resources to focus on value-added services and increases company profitability.

Value Proposition

Powered by industry-leading business intelligence technology from Cognos®, this integrated software solution provides self-service, intelligent, out-of-the box analytics for pervasive performance management. The solution is Web-based, provides an intuitive user interface and allows everyone in your organization from the CFO to individual project managers and purchasing agents’ to create their own customized reports from an existing library – all without the help of your IT departments. Project-driven enterprises and government contractors can quickly report on all facets of the business, improve decision making and dramatically reduce operating expenses.

Company Description

Headquartered in Herndon, Virginia, with 14 Offices Worldwide and more than 1,200 employees, Deltek is the leading provider of enterprise software solutions designed specifically for project-focused businesses. For more than two decades our software applications have enabled organizations to automate mission-critical business processes around the engagement, execution and delivery of projects.
