

# A Business Partner Solution for the Financial Services Sector

A Turnkey Reporting, Analytics and Scorecarding Solution

## Fidelity Information Services, Inc.

Horizon 360

### Solution Description

Horizon 360 provides the banking industry with integrated, enterprise reporting, analytics, and scorecarding to support better decision-making.

The solution provides timely access to business-critical information through Horizon 360 core systems and applications. It also establishes an information platform that allows your organization to integrate enterprise application data sources. This provides executives, managers, and operations teams with a single source of enterprise information to support faster decision-making to grow the business and strengthen shareholder value.

### Features & Benefits

- Better, faster decisions: Immediate access to a single source of business-critical information
- User self-service: Allows non-technical business people to access information and develop ad hoc reports to immediately answer unique questions, transforming information into action
- Significant time and cost reduction: Minimizes or eliminates data search, re-keying, cutting and pasting, printing and distributing, and emailing reports; minimizes IS report development and deployment resource requirements
- Reduces total cost of ownership: Employs single or tightly integrated applications, database and dispatch servers to minimize administration and support time and cost

### Value Proposition

Horizon 360 eliminates the challenge of limited access to application data for reporting; multiple data sources that cause conflicting facts; and spreadsheet-based decision support that provides limited and error-prone information at great time and expense. Managed reporting supports higher performance.

Business users gain access to information through ad hoc reporting, interactive standard reports, multidimensional reporting, interactive exploration and discovery, banking performance dashboards, and integrated scorecards and strategy maps.

### Company Description

Fidelity National Information Services (FIS) is the world's top-ranked technology provider to the banking industry. With more than 24,000 experts in 90 countries, FIS delivers the most comprehensive range of solutions for the broadest range of financial markets, all with a singular focus: helping you succeed. Every FIS solution has the strength you need for profitability today, and the power to help you manage whatever comes next. FIS is part of the S&P 500.
