

# Ineum Consulting

iH&GI (Ineum Hospitality & Gaming Insight)

## Solution Description

Ineum Hospitality & Gaming Insight (iH&G) is a pre-built analytic software application for the Hospitality and Gaming (H&G) industries. It is designed to integrate the process from data source extraction through report generation while addressing the H&G industry's specific financial and operational reporting needs and pain-points.

## Features & Benefits

- Integrated management support for accelerated decision making
- Proactive management solution that automates, standardizes and integrates financial & operational reporting
- Allows management to do its job more efficiently and effectively; while reducing costs and maximizing profits
- Provides the information to the decision making community at a lower total cost of ownership as well as the lowest possible support and maintenance cost in the industry
- Lowers overall costs associated with data management through vendor maintenance and support
- BI environment that can be co-managed by business and IT due to the automation included in this application

## Value Proposition

### Increase Revenue from Operations and Manage Costs

#### Make operational decisions and deliver results with

- Timely, accurate analysis of operational performance against targets
- Better insight at the property and departmental level
- Visibility across properties
- Visualization of trends and exceptions

#### Allocate Resources Effectively

- Improve forecasting accuracy and timeliness as a driver of operational management with driver-based forecasting based on understanding of trends, variances, and outliers

#### Manage to Forecast

- Align month-end operational results, closed GL, and forecast with operational reports that provide timely, accurate insight into operational revenue and direct cost
- Actual, estimated, and allocated costs that hit the GL but may not be visible in operational reports
- Detailed forecast
