JSC Global Solutions

Interactive Risk Management Analysis and Reporting/Prime (iRMAR/p)

IBM

Solution Description

The Interactive Risk Management Analysis and Reporting/Prime (iRMAR/p) solution supports the in-depth analytic demands of organizations that need to manage high volumes of claims related data such as insurance carriers, brokerage firms, consulting firms, and large employers. iRMAR/p is an integral and a vital resource for managing risk, controlling costs, and improving productivity. It provides the reports and analytics to support your decision-making process.

Features & Benefits

iRMAR/p combines JSC's premier data management services, application development, and Web-based distribution with IBM Cognos ReportNet and IBM Cognos Power Play. It includes a compilation of the most commonly used reporting applications so you can begin to instantly analyze your risk management information. The solution allows you to combine your claim and policy data into a single repository and conduct more in-depth P&C risk management analysis and reporting than ever before. Features include:

- Aggregate reports; trending and loss triangles reports; integrated claims and exposure reports; as well as integrated claims and policy reports

- Transactional payment history

- Rich graphing capabilities

- Comprehensive ad-hoc reporting

- Robust drill-down analysis and drill-through to detailed reports

- On-demand and scheduled report distribution with integrated email notification

- Reports can be printed or exported to MS Excel, PDF format, and other popular applications

Value Proposition

iRMAR/p is JSC's Web-based P&C insurance claims tracking and analysis product. Employers, Insurance companies, Brokers and TPAs are able to analyze and control loss costs using this product. iRMAR/p offers unparalleled value and flexibility, leveraging existing templates and database structures using industry standard technologies.

Company Description

JSC Global Solutions, Inc. is an IT and BPO Solutions company, in existence for over a decade with an excellent track record of providing IT and BPO Solutions to its clients. Our services include Turnkey Projects, Outsourcing of Development & Maintenance, Data Warehousing & BI Products & Services, Staff Augmentation, and Business Process Outsourcing (BPO). We also provide tremendous value to our clients by leveraging our off-shore operations in India.

JSC's expertise spans several industries; however, we have developed a significant focus in Insurance and Manufacturing. Our Risk Management Information System product iRMAR – Interactive Risk Management Analysis and Reporting, is reflective of our Insurance domain expertise, understanding of decision support & BI applications, and state of the art technology.

JSC Global Solutions, Inc. distinguishes itself from its competitors through the range and quality of its global resources, the depth of its industry insight, project management and technical expertise. Our flexible and collaborative approach results in highly satisfied customers.
