

# A Business Partner Solution for the Industrial Sector

Making Operational Data Available in Near Real Time

## Jaros Technologies Corporation

Analytics for Oracle's E-Business Suite

### Solution Description

Jaros is a comprehensive business intelligence solution that enables business reporting for customers who run Oracle's E-Business Suite (EBS).

Jaros Analytics unlocks Oracle EBS data for the business. It is a unique hybrid solution that makes operational data available in near real time using the operational data store. It also facilitates strategic decision-making and analysis using the solution's data marts.

There are six major components of the solution:

- A Cognos 8 reporting layer
- Industry-specific data models
- Pre-built ETL mappings
- An Active Meta Data Repository (AMDR)
- Software that installs the product and allows customers to apply maintenance patches and enhancements
- A pre-built operational framework and execution workflow engine

### Features & Benefits

A key benefit of Jaros Analytics is the ability to provide right time information: near real time, nightly, monthly, quarterly, or yearly data. This supports all operational and strategic reporting needs. It provides detailed and summary information in areas such as:

- General ledger and sub ledger
- Revenue and margins
- Open receivables and payables
- Cash management and receipts
- Cost of Goods Sold
- Inventory value and inventory turns
- AR and AP invoices
- PO requisitions, orders, and receipts
- Vendor and customer performance

### Value Proposition

The solution provides access to detailed data from Oracle E-Business Suite modules including Financials, Working Capital, Orders Management, Procurement, iProcurement, Inventory, Cost, Discrete Manufacturing, Process Manufacturing, Services and Contracts, HR, Payroll, Oracle Learning Module, and more.

It is a fully documented solution that uses an active metadata repository with a Web-based help system. The built-in ETL product is consistently rated as one of most scalable by expert analysts firms. It further supports implementations without open-ended consulting engagements.

### Company Description

Jaros develops packaged Business Intelligence software to help companies be more efficient and effective and gain visibility into their business. Founded by data warehouse expert Paul Scheibal, Jaros initially gained a track record of creating successful custom data warehouses. These data warehouses were architected to be faster and more dependable when solving the business' problem. For more information please visit [www.jarostech.com](http://www.jarostech.com).
