

# JasperSoft

## Business Intelligence Suite

### Solution Description

The JasperSoft Business Intelligence (BI) Suite is a comprehensive portfolio of products for reporting, data analysis (OLAP), and data integration (ETL). Components of the BI Suite include:

- **Jasperserver:** an interactive, ad hoc, and managed report and dashboard server for end-users; built on a secure and robust Business Intelligence platform.
- **JasperAnalysis:** a relational OLAP server with an easy-to-use Web-based user interface and integration with Microsoft Excel.
- **JasperReports:** the world's most powerful and widely used embeddable Java reporting library for report designers and developers.
- **JasperETL:** used to graphically design, schedule, and execute data extract transform and load (ETL) operations for business intelligence projects, such as operational data stores (ODS), data marts, and data warehouses.
- **iReport:** the heart of the JasperReports interface — the visual report designer specifically designed for JasperReports. iReport gives administrators and report designers total control over the contents as well as the look and feel of every report.

### Features & Benefits

JasperSoft's BI Suite is a best-in-class, open source solution with the following product highlights:

- Integrated or stand-alone reporting and analysis
- Analytic and operational data integration
- Cost-effective for workgroups and small businesses
- Secure and enterprise-ready
- Leverages existing IT infrastructure servers and services
- Deploys quickly for fast ROI
- Seamlessly embeddable in business applications, such as ERP or CRM

### Value Proposition

JasperSoft commercial and open source solutions are the cornerstone of many mission-critical applications. They provide real-time information delivery in critical areas such as financial auditing and reporting, customer self-service, systems performance and tuning management, and compliance management. JasperSoft solutions enable companies of all sizes to place precise operational information into the hands of the everyday user, as well strategic information into the hands of the business analyst and executive.

### Company Description

JasperSoft is the market leader in open source Business Intelligence (BI). With more than two million product downloads, 5,000 customers, and over 20,000 deployments in 81 countries, JasperSoft delivers the world's most comprehensive solutions for data access, analysis, and reporting that empower today's key decision makers.

#### IBM Segment

- Data Management
