OpenPages
Governance Suite

IBM

Solution Description

The OpenPages Governance Suite combines best-in-class applications for financial controls management, operational risk management, IT governance and strategic performance management. Hosted on the OpenPages Governance Platform, these applications provide a modular and integrated approach to governance, risk, and compliance management.

They allow your organization to achieve and sustain compliance across multiple regulations; manage risk across the business; and ensure that operational performance meets strategic corporate objectives.

Features & Benefits

Business Governance is OpenPages' vision for unifying the management of governance, risk, and compliance across the organization. It enables the visibility, decision support, and control to:

- Improve accountability
- Better manage risk
- Achieve compliance with numerous regulations
- Improve operational performance
- Align strategies to ensure better results

Value Proposition

OpenPages software enables a well-governed business by providing a single enterprise system for managing governance, risk, and compliance procedures and policies. With capabilities to identify new business opportunities and route out losses from business risk, OpenPages helps your organization implement a strong business governance practice that results in improvements to top- and bottom-line performance and a higher valuation from investors.

The OpenPages Governance Platform unites governance, risk, and compliance information into a single management system. Through a set of shared services, the platform enables interoperability between OpenPages applications, so your organization can easily manage shared processes, risks, and controls across the enterprise.

With this capability, you can better understand the interrelationships between multiple disciplines of governance, risk, and compliance in order to reduce duplication of effort, increase efficiency, increase visibility into operations, and make better business decisions.

Company Description

OpenPages® is the leading provider of integrated risk management solutions for global companies. OpenPages solutions enable the world's largest companies to identify and manage key business risks across the enterprise. For more information please visit www.openpages.com.
