Business Challenge

Finding a solution for small to midsize companies that has power, flexibility, and support to face today's challenges with confidence and welcome the business and technological changes to come.

Solution Description

Sage Accpac ERP is an award-winning accounting system built on world-class, object-oriented, multi-tiered architecture. An integrated suite of end-to-end business management applications is available, including SageCRM for customer relationship management and Sage ePOS for point-of-sale applications. Deployment options include support for IBM DB2 including as an appliance model based on an IBM xSeries® server.

Sage Accpac offers high performance, advanced functions, and unmatched freedom of choice. You can choose the applications, technology, and deployment options you need most, and can easily customize and enhance your system as your business needs evolve. Plus, Sage Accpac provides a transparent, bidirectional data flow between all parts of your system—the back office, the front office, the warehouse, and more—delivering instant integration, flexible deployment options, and unparalleled investment protection.

Value Proposition

Sage Accpac helps businesses operate more efficiently and profitably, through better control, tighter integration, and enhanced visibility. Available in three robust editions (Sage Accpac 100, 200, and 500), you can deploy it on site or as a hosted application, and can easily accommodate the changing needs of your growing organization.
