The Welland Company
FORMs and EXPORT

IBM

Solution Description

Welland's Knowledge Based software, FORMS®, is designed to easily improve document preparation and issuance by automatically identifying, completing and printing documents to exact business requirements.

EXPORT allows for the translation of complex and specialized data into industry-standard formats. EXPORT is designed to help retrieve information quickly and easily from any UniVerse/UniData database, allowing for data to be mined, warehoused or Web-enabled.

Features & Benefits

FORMS:

- Company specific and industry standard forms are created with predetermined rules and database lookups and stored in a central online library

- Maintains an audit trail of all work performed

- Varying levels of access and authorities can be set up to insure security

- Built on a standard JAVA/XML framework, FORMS uses any SWL-compliant database such as Oracle or Microsoft's SQL Server for its data storage needs

- Each document is generated in either Adobe Acrobat or Crystal Reports software and prints in PDF format with Microsoft's standard printing capabilities

EXPORT:

- Imports MulitValue data into an Oracle or MS SQL database as an operation data store (ODS) for reporting or data-warehousing purposes

- User-friendly interface

- Highly configurable to meet specific needs

- Views or subsets of data may be saved and referenced again or used with the scheduling feature

Value Proposition

The Welland Solutions offer insurance industry clients with customized software solutions. FORMS adds efficiency to document management by speeding up processing times, reducing overhead costs, improving data accuracy, and ensuring compliance.

EXPORT simplifies the usually lengthy and trouble-prone process of extracting data from systems. Furthermore, EXPORT translates complex, specialized data from UniVerse/UniData into an industry-standard format allows for quicker, more reliable and easier data access and reporting.

Company Description

The Welland Company's mission is simple: To provide clients with customized software solutions supported by prompt and thorough service. Whether working as a consultant or a complement to your IT department, Welland consultants hit the ground running and strive to meets your business and users goals. Because they have software development expertise and business specific knowledge, they produce results that otherwise might not be achieved.
