

Wherescape Software

RED

Solution Description

WhereScape RED is a data warehouse development and management software solution designed to significantly shorten the build cycle and reduce ongoing maintenance costs. Data warehouses are developed using an iterative approach, which allows the user to see results quickly, give feedback and make necessary changes. The unique WhereScape Workbench is a powerful development environment that provides the development team with a single interface for design and ongoing maintenance.

Features & Benefits

- Ability to design and build an entire data warehouse in a matter of days or weeks, including the build-out of second tier tables - aggregates, views, etc
- Includes a workbench that enables development teams to rapidly develop and handle the data warehouse maintenance
- Data movement, scheduling and dependency management facilities ensure that all data in the data warehouse is accurate and in synchronization with source system data
- All data warehouses automatically generate their own user documentation in HTML format, ready for integration into client-side environments and for posting on internal web servers
- Because the WhereScape RED Repository™ maintains all versions of the data warehouse within its repository, changes requested by analysts in content or structure can be implemented quickly – often overnight – and rolled back if issues arise

Value Proposition

The WhereScape RED solution builds a working DB2 data warehouse in a matter of days and can then be trial-tested with users, tuned and refined until the customer is completely satisfied. The solution automates the entire data warehouse lifecycle, so ongoing operation and maintenance is a snap. With the WhereScape RED solution, keeping your warehouse up-to-date is a drag-and-drop operation.

The solution generates data warehouse objects, DB2 procedural code, tables, view indexes, etc. The integrated metadata can be used to generate documentation as well as various type of impact analysis.

Company Description

WhereScape Software is one of the world's leading data warehouse software companies. Our team is recognized internationally for its expertise and pragmatic approach. Download WhereScape RED or schedule a free web demo at www.wherescape.com. Email us at red@wherescape.com to take up the 24-hour challenge.

IBM Segment

- Data Management

Business Function

- Data Warehouse Life Cycle Management

Target Industry

- Cross Industry
