

Misys

Banking Solution Suite

Solution Description

Misys offers a comprehensive, integrated solutions suite that has been developed to help banks achieve their business goals which include: streamlined operations, new product launches, reduced costs, improve customer satisfaction, increased revenues and reduced risks. Three decades of combined knowledge of banking markets, combined with IBM's proven technologies, makes the solution suite a compelling choice for delivering faster implementation, closer integration, lower costs and better service.

Features & Benefits

- Misys Message Manager: an advanced standards based, enterprise-wide financial message hub. It allows the streamlining of financial messaging via a single central messaging hub that supports all international messaging standards
- TI Plus: consists of a comprehensive set of Business Applications designed to satisfy the processing requirements of the Trade Finance department of a bank
- Misys Trade Portal: a unique integrated e-business solution offering importers and exporters a full-featured console to seamlessly connect to their banks
- Misys BankFusion Universal Banking: a component-based solution that provides the full range of retail, corporate and trade banking services

Value Proposition

Misys provides solutions for a wide range of strategic banking issues. By providing flexible and productive tools for all aspects of modern banking, risks are minimized and costs are reduced. Misys provides state of the art technology to empower banks with innovative solutions that attract and retain customers, improve efficiencies and increase profitability.
