Enterprise Flow Technosoft Services Private Limited
EnterpriseFlow

IBM

Solution Description

EnterpriseFlow is a highly customizable, feature-rich ERP software platform offered in the SaaS (Software as a Service) model of delivery. The solution addresses the sales cycle, purchase cycle and manufacturing cycle. EnterpriseFlow can be fine-tuned and customized to specific business requirements, and because it is "pay as you go", it is an ideal solution for small to medium sized companies.

Features & Benefits

EnterpriseFlow gives companies the ability to:

- Store and retrieve all types of business documents using the Document Management System, designed to meet the needs of all types of businesses.

- Capture and manage leads from websites as well as with existing customers, vendors and employees via email.

- Accept payment on the web, in a dozen of the world's leading currencies, as well as enabling payment acceptance using Paypal.

- Sell products and services over the web in multiple currencies.

- Sell products and services at "brick-and-mortar" outlets, using EnterpriseFlow's POS software.

- Allow all entities (customers, vendors, employees, etc.) to login to EnterpriseFlow Portal to view their account status in real time, cutting down on costly customer service calls.

- Give customers the ability to make payments, in addition to purchasing products and services, by logging into a portal.

- Allow service organizations to bulk bill students or members, in specified frequencies (i.e. bi-weekly, monthly).

- Maintain an accurate inventory of all products, including end items, WIP items, raw materials and components, both in terms of quantity and value.

- Maintain complete information regarding Product Serial Numbers and Lot Serial Numbers.

- Rapidly generate the most important business documents, including Quotations, Purchase Orders, Sales Orders, Invoices, Purchase Requisitions and Work Orders.

Value Proposition

EnterpriseFlow is offered in the SaaS model. Accordingly, clients need not make a capital investment to use our software and services. Our solution allows companies to "pay-as-you-go". Start with a no-cost 1-User account, with ample resources for your evaluation, as well as for a small business on a growth path. If more software is needed, EnterpriseFlow allows for custom builds, based on company specification, on any platform (.NET, Flex, Java, Python, or other) using the high-level HTTP APIs.)
