

A Business Partner Solution for the Cross Industry Sector

Quickly Compare Two Versions of Documents

Fairfax Data Systems, Inc.

Compare Plug-In

Technology Description

Fairfax Data Systems' Compare Plug-In integrates with Microsoft Word and IBM FileNet P8 Workplace to compare Microsoft Word documents easily and seamlessly from Workplace. IBM FileNet Workplace users can compare versions within a document or versions from two different documents.

Compare Plug-In also integrates with Microsoft Windows Explorer, allowing users to compare documents between Workplace and Microsoft Explorer.

Compare Plug-In adds a comparing context menu to the Windows Explorer and Workplace browse and search results list, which allows users to easily select the revised and original documents and execute the comparison.

Compare Plug-In will then launch the Microsoft Word Compare utility in the background to create a redline document that highlights the differences between the two documents and will automatically open the redline document into Microsoft Word.

Features & Benefits

- Quickly find the differences between two versions of a document.
- Shorten the editing and approval process.
- Ensure the accuracy of modifications made to documents.
- Enhances the "compare documents" feature of Microsoft Word.
- Seamless integrates with IBM FileNet Workplace.

Value Proposition

Compare Plug-In seamlessly integrates with Microsoft Word, Microsoft Excel and FileNet Workplace, allowing users to easily and intuitively compare two versions of Microsoft documents. Users can compare two versions of the same document, compare two different documents in FileNet P8 or compare documents in FileNet P8 with documents on the local or network shared directory. This solution is easy to use and allows for quick recognition of the differences in each version. Compare Plug-In is especially beneficial for legal and contracting departments, loan application review and for the review of engineering specifications documents.

IBM Segment

- Enterprise Content Management

Business Function

- Content Authoring, Viewing, Editing

Target Industry

- Cross Industry
