

A Business Partner Solution for the Cross Industry Sector

View, Annotate, Redact and Publish

Informative Graphics Corporation

Brava!®

Technology Description

The Brava!® tool from Informative Graphics Corporation (IGC) provides an easy way to share content across the enterprise. It extends the capabilities of the IBM FileNet P8 platform to include multi-format viewing, annotation, redaction and publishing in one easy interface. Brava is server software, so there is no need to install or maintain software on every desktop.

Brava can view virtually any document format, including office documents, TIFF, PDF, image formats and CAD drawings, so it is perfect for review and approval cycles. Easily add comments, markups and stamps to any document. The annotations are saved in an overlaid XML-based format, leaving the source file unaltered.

Brava's redaction tool removes sensitive content and privacy information. Users can redact by word/phrase, phrase list or zone and add exemption codes citing the reason for redaction. Brava creates a new rendition in PDF, TIFF or secure Content Sealed Format (CSF) format and never alters the source file. Easily publish files to TIFF, PDF or our secure CSF with Visual Rights®. Proprietary and completely secure, CSF lets you add password protection; restrict print, copy, layer views and more; add watermarks and banners; and time-expire the file. Brava is an easy, responsive, and proven solution to manage and share electronic content across your entire enterprise.

Features & Benefits

- Boasting excellent fidelity and supporting virtually any document format, Brava tools are perfect for enterprise-level review, collaboration, and other critical business processes.
- Publishing files to our encrypted, propriety CSF format with Visual Rights® lets users add another layer of security with password protection, usage restrictions, watermarks and banners, and even time-expiring files.
- Scalable, Brava can easily handle the load demands of large, enterprise-wide deployments that stretch out into the vendor supply chain and to customers.

IBM Segment

- Enterprise Content Management

Business Function

- Content Authoring, Viewing, Editing

Target Industry

- Cross Industry

- Original files remain untouched so whether annotating, redacting, or just viewing, the source file remains safe in the repository.
- Brava's term-hit highlighting finds specific search terms and displays documents with all instances of a search string highlighted for quick identification.

Value Proposition

A recognized leader in quality viewing and annotation, Brava is deployed across almost every industry and has millions of installed seats worldwide. Brava Enterprise seamlessly integrates into IBM FileNet P8 and other IBM applications that use Web service. Easy to install and easy to use, Brava honors user rights, leverages metadata, and creates annotations following FileNet P8's object model. A solid return-on-investment, Brava maintains document security, aids quick user adoption, improves cycle times, and speeds collaboration and other workflows.

Solution areas where Brava can provide the most value to IBM customers:

- **Efficient Document Access:** Brava's multi-format viewer allows access to virtually any document in an easy, single interface.
- **Privacy/Security:** Efficient, intelligent capabilities to protect confidential information with proven redaction technologies for secure, automated redaction and formats.
- **Collaborative Enterprise:** Viewing and annotation with features such as concurrent user markups, unaltered source files, document security controls, and more.
- **Communications:** Flexible publishing and content transformation.

Company Description

Informative Graphics Corp. (IGC) is a leading developer of viewing, annotation, redaction, and publishing software. Since 1990, IGC has helped companies securely share electronic content across the extended enterprise. Over the years our technology has evolved, but our passion remains the same—deliver easy, responsive, proven solutions to our customers.
