

# A Business Partner Solution for the Cross Industry Sector

Adds Total Functionality and Security to IBM ImagePlus

---

## **SYSCOM, Inc.**

*Advanced Image Solution (AIS+)*

---

### Technology Description

Advanced Image Solution (AIS+) is a customer information control system (CICS) application for users of IBM ImagePlus 3.1. AIS+ provides folder management, document management and workflow functions via an easy-to-learn and productive user interface. AIS+ is built upon standard ImagePlus interfaces to ImagePlus Object Distribution Manager (IODM) and folder application facility (FAF) API databases.

Folder searches are executed using index values. Document management functions include, document captures via manual indexing and scanning or via high-speed scanning. Document images can be viewed on-line, printed or routed to fax servers for distribution. Workflow capability consists of document routing and aging tables. AIS+ also provides web enabled access of ImagePlus managed objects to non-z/OS end-user web applications.

### Features & Benefits

- Multiple secondary index structures.
- Full document routing support.
- Security at the group level.
- High volume printing.
- Web access to ImagePlus documents.

### Value Proposition

SYSCOM's Advanced Image Solution Plus (AIS+) provides an alternative solution for a front-end application to ImagePlus. AIS+ combines the existing functionality of IBM's front end, folder and workflow application (FWA) with enhanced features for customers looking for a more comprehensive application. For instance, AIS+ can enable external non-z/OS based end-user application interfaces to retrieve ImagePlus object using a web interface.

Projects commonly include large IBM ImagePlus z/OS mainframe user installations that require high-volume processing of commonly accessed data. AIS+ can be implemented as an enterprise-wide imaging utility that supports multiple applications by maintaining independence of databases, screen sets and exit logic.

### IBM Segment

- Enterprise Content Management

### Business Function

- Security

### Target Industry

- Cross Industry
