A Business Partner Solution for the Cross Industry Sector

Connects IBM Content Integrator Enterprise Edition to IBM Content Manager for iSeries

SYSCOM, Inc.

SYSCOM Connector for IBM Content Integrator to IBM Content Manager for iSeries

Technology Description

Organizations that use IBM Content Manager for iSeries and IBM ImagePlus Workfolder Application Facility (WAF) have long desired a tool that will allow federated access to their content client application. SYSCOM's Connector for IBM Content Integrator to IBM Content Manager for iSeries is now available. In one easy-to-use browser window, workers can access content from all repositories and leverage features such as federated search and document copy between repositories.

Features & Benefits

- Allows ImagePlus WAF to participate in a Content Integrator federated search.
- Allows image retrieval from ImagePlus WAF by a web-based client.
- Content Manager for iSeries and ImagePlus WAF user exits are supported.
- Includes customizable web client components for building your own web client.
- Supports all types of images including Mixed Object:Document Content Architecture (MO:DCA).
- IBM coded data with overlay structures can also be supported with a proper viewer.
- Function calls to ImagePlus WAF can be customized by the user to perform many functions like move/copy, re-index, delete, doc routing in addition to the standard search and retrieve.

Value Proposition

SYSCOM Connector for IBM Content Integrator to IBM Content Manager for iSeries allows web access to Content Manager for iSeries and ImagePlus Workfolder Application Facility managed images via a standard Web Client. Integration with IBM Content Integrator and WEB 1.0.3 is also supported. This connector also integrates with IBM FileNet Content Federation Services (CFS).

SYSCOM INC

IBM Segment
- Enterprise Content Management

Business Function
- Content Federation

Target Industry
- Cross Industry

Do you have the need to find images in IBM Content Manager for iSeries, IBM FileNet P8, IBM FileNet Image Manager, IBM Content Manager and DB2 ImagePlus for z/OS at the same time? Use this connector along with the FileNet P8, FileNet Image Manager, IBM Content Manager and DB2 ImagePlus for z/OS connectors all together with Content Integrator and federate across all five.   Implementing Content Integrator with the right connectors will allow you to leave the original where it is and still find it.
