

# A Business Partner Solution for the Cross Industry Sector

Store Metadata and Image Objects into IBM DB2 ImagePlus for z/OS

---

## **SYSCOM, Inc.**

*MVSCoconnect*

---

### Technology Description

SYSCOM's MVSCoconnect is a high-speed document store interface that integrates IBM DB2 ImagePlus for z/OS system with Kofax Capture. The MVSCoconnect system supports real-time and batch store of documents captured through Kofax Capture. MVSCoconnect can be configured to run as an application or services under the Microsoft Windows operating system.

The MVSCoconnect validation module is used in conjunction with standard Kofax Capture Index module to provide users a real time index data validation interface to IBM DB2 ImagePlus for z/OS.

### Features & Benefits

MVSCoconnect improves the usability of the release/store process through:

- Error reconciliation of failed images or indexes, including additional logging.
- Enhanced graphical reconciliation module.
- Enhanced user exits.
- Improved file handling and performance.
- Improved bandwidth utilization.
- Improved error correction features.
- Batch store capability.
- File distribution manager for high volume sites.
- Configurable for ingestion of metadata and images from other capture products and electronic document creation applications.
- Supports ImagePlus based front-ends like FAF/FAW and SYSCOM's AIS+ and can be customized to support other custom build ImagePlus front-ends.

### Value Proposition

SYSCOM's MVSCoconnect provides seamless integration of Kofax Capture and IBM DB2 ImagePlus for z/OS. MVSCoconnect can also be configured to accept metadata and images from other image sources and it's not volume based. Large scale implementations can be built using multiple servers or sites.

### IBM Segment

- Enterprise Content Management

### Business Function

- Import/Export

### Target Industry

- Cross Industry
