enChoice
KwikWork® Export/Import Tools

Technology Description

enChoice's KwikWork Export/Import tools perform migrations from IBM FileNet Image Services or IBM FileNet Content Services systems, consolidates multiple IBM FileNet P8 environments, and ingests content from 3rd party systems (conversions) or capture solutions. The tools are easily configured to create relationships across disparate systems, map metadata fields, consolidate document classes, remove extraneous information, as well as ensure system fields are kept intact (i.e. creation date). Additionally, KwikWork tools handle document versioning as well as annotations.

Features & Benefits

- Configurable tools for system migrations, consolidations, and conversions.
- Customer-driven effort & costs are contained.
- Consolidation and continuity of metadata (i.e. creation date).
- Consistency & accuracy of information, including versioning and annotations.

Value Proposition

enChoice's KwikWork tools automate the migration of customer assets to IBM's Enterprise Content Management (ECM) technology in a risk-free, cost effective manner. The total cost of ownership is contained, enabling the procurement of the latest ECM offerings. Customer assets are kept intact, including metadata, system fields, versions, and annotations, where applicable, and they can affordably convert, migrate, and/or consolidate to the latest ECM technology. Additionally, customers can protect their initial investment relative to capture technologies, leveraging the KwikWork Import tool set.
