

Classic Development Tools

IBM offers a suite of products to enable clients to connect to its Informix databases, access data spanning multiple data sources, and work with a variety of specialized data types.

4GL

The IBM Informix 4GL family provides a character based, fourth-generation application development environment that includes the Rapid Development System, Interactive Debugger, and 4GL Compiler. IBM intends to continue to sell and support this product. Investigation is currently underway to support DB2 as a database for 4GL applications - it is anticipated that this will be available in 2002.

Notice:

This document expresses IBM's current intentions and plans, which are subject to change. This document is not intended to and does not create a binding obligation of IBM to provide maintenance, support, enhancements or upgrades for any product. Maintenance, support, enhancements or upgrades for IBM Informix products will be provided in accordance with and subject to the terms of specific written agreements.
