

## IBM Quick Win Pilot for Advanced Case Management

*Collaborative, Continuous, and Iterative Case Solutions*

The IBM Quick Win Pilot for Advanced Case Management is an IBM-led **10-week delivery project** that can help lead to a successful **initial solution** that establishes an operational platform for **case management** and the associated **content and process capabilities**.

### Let IBM help you get off to a successful start with a Quick Win Pilot (QWP)

- Do you have an immediate/committed go-live date for an identified case/process and are willing to make scope tradeoffs to efficiently build a first iterative release?
  - ***QWP can be completed in a 10-week time frame!***
  
- Do you need a dedicated or skilled team to start a case project?
  - ***QWP is led by IBM experts who will leverage your subject matter experts as needed.***
  
- Do you want a fast initial project success to showcase and foster support for broader adoption?
  - ***QWP can help you succeed with its defined duration, price, staffing plan, and approach***
  
- Are you looking for an iterative and agile approach to defining requirements supporting your business' changing needs...*build with the business, not for the business*?
  - ***QWP can help quickly define the initial scope (weeks 1-2) and perform stakeholder feedback sessions biweekly.***
