

# IBM BigInsights Services

*Build your BigInsights Solution based on proven methods & practices*

---

## Highlights:

- Leverage IBM experts to seamlessly install and configure IBM BigInsights in your environment
  - Get support in defining the right big data architecture that would address your business need
  - Accelerate your implementation lifecycle by developing a powerful analytics solutions leveraging the built-in text processing engine and library of annotators
- 

Many companies are seeing dramatic growth in the variety, velocity, and volume of information being generated by their businesses. Organizations are struggling with how to analyze these vast and diverse data sets and find insights in these new and unconventional data types such as sensor data, web pages, web log files, click-streams, search indexes, text messages, and email etc.

As part of the IBM Big Data Platform, IBM BigInsights® enables new solutions that turn large, complex volumes of data into insight, cost effectively. IBM BigInsights delivers an enterprise-ready big data solution by combining Apache Hadoop, including the MapReduce framework and the Hadoop Distributed File Systems (HDFS), with unique technologies and capabilities from across IBM.

## What we offer

Our IBM Analytics Services team offers a number of services which can accelerate your adoption to this new exciting technology.

### Planning and Design of BigInsights Solutions:

Once your team has familiarized themselves with the basics of IBM big data technology, our technical experts will guide you in selecting the right use case and designing and planning your first big data solution focusing on how to best apply the technology to solve your identified business need.

### IBM BigInsights QuickStart:

Our technical professionals will support your team in specifying the BigInsights components to install and how to configure your platform. The engagement can be customized to spend more time on different activities, depending upon your needs.

### Cloudera to IBM BigInsights Migration Assessment

This assessment is focused on helping you to determine the optimal migration scope and plan to migrate your big data environment to IBM BigInsights.

Our consultants will conduct workshops focused on understanding your current environment and future environment requirements to help you build a successful migration strategy and approach.

### **IBM BigInsights Query-ready Archive**

Our experts will help you to free up capacity in your enterprise data warehouse by offloading rarely used data to Hadoop. You can use IBM BigInsights as a query-ready archive for storage of queryable data where your data remains easily accessible and provides you with a platform for ingestion of new data.

### **Custom projects**

Our technical resources will support you in your integration projects with your existing data warehouse solution or any other type of custom project you may have.

## **About IBM Analytics Services**

The Analytics Services organization provides expert services exclusively focused on the IBM Analytics product portfolio. Our depth of experience and extensive proven practices help clients mitigate risks, raise the quality of their implementations and build valuable skills. We have provided guidance, advice, reviews, assessments and assistance to thousands of clients around the world enabling them to maximize the return on investment for both their on premise and cloud based analytics solutions.
