

## IBM Information Management Software Services Data Governance Solution Workshop

IBM architects will assess your organization's maturity and readiness to implement a data governance solution based on your business objectives and current challenges. You will receive a proposed data governance implementation plan that includes products, services offerings, performance metrics, and industry use cases to implement data governance policies successfully in your organization.

### Activities & Deliverables

In this workshop, IBM experts will work with both line of business and IT teams to:

- Conduct a data governance readiness assessment based on IBM Data Governance Council models to analyze the governance pain points in your organization
- Understand data governance's role in compliance and regulatory requirements, reporting and auditing capabilities, security, and process improvement to establish plans for quality data and business processes throughout the enterprise to improve accuracy and enhance IT performance
- Educate your team on governance topics from a technology solution perspective, providing a holistic view of the elements needed to successfully implement strategic and tactical data governance projects

### Highlights

- ***Deep-dive into governance topics from a technology solution perspective***
- ***Discover organizational data to identify and assess governance challenges***
- ***Establish plans for quality data and business processes throughout the enterprise***

The Data Governance Solution Workshop is a key part of the Information Agenda strategy, and aligns to the IBM Data Governance Council Maturity Model to provide you with a proven approach to evaluate your identified governance challenges. This workshop will assess the business value and impact of data governance policies on your organization to direct your data governance initiatives and maximize the value of your IT investments.

As part of the Data Governance Solution Workshop, you will learn how to plan for quality data and apply business processes to improve data integrity, enhance IT performance, foster cross-organizational collaboration, and address common pain points such as compliance and regulatory requirements, reporting capabilities, and process improvement.

- Define metrics to measure business value, organizational impact, and project success related to data governance strategy in order to maximize the value of your IT investments
- Discover organizational data including where data is located, how it is related, and how it is being used to identify and assess challenges

At the end of the workshop, you will receive a comprehensive, customized solution plan that includes software, IM Services offerings, and industry specific use cases to guide you in executing governance projects.

### **Your independence is our greatest success**

That is the underlying theme to our delivery approach for the Data Governance Workshop Solution Offering. We believe that nothing is more important than transferring our knowledge to your organization. This provides you with long-term self-sufficiency through our mentored and parallel working approaches.

### **Engage Today**

With a worldwide team of highly trained services professionals, the IBM Information Management Software Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met. Our experts are ready to assist your organization with:

- Establishing project goals, expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership

Available for whatever the delivery approach your business requires, the IBM Information Management Software Services team will produce results quickly, and will help to put your project on the road to success.
