

Highlights:

- Shorten migration time, reduce costs and free up resources to increase productivity
 - Effectively migrate data environments with a high-speed data transfer built specifically for DB2 databases
 - Change distribution keys, range partition keys or dimensions of tables to allow re-partitioning or re-clustering of data
-

Data Mover Tool

Efficiently and effectively upgrade and migrate

Now you can upgrade and migrate your database environment quickly using the new IBM Data Mover Tool. Upgrade your data, while taking advantage of the many features of the latest version of IBM DB2®.

During the data upgrade process for your DB2 environment, this valuable tool can help automate and shorten migration time, reduce costs and free up resources to increase productivity.

Now is the ideal time to engage IBM Analytics Services and upgrade DB2 from older versions.

When to use the Data Mover Tool

- You urgently need to upgrade an unsupported version of DB2 or your Service Extension is about to expire
- You want to exploit the many new features of DB2 and transform your database environment
- You need to realign your DB2 environment for future growth and innovation
- You seek more efficiency and lower development time and costs
- You understand the benefit of automating migration to save valuable IT staff time and increase productivity

The Data Mover Tool can help

Instead of traditional version to version database migration, many IBM clients have chosen IBM Analytics Services to upgrade their environment and migrate their data to new hardware using the Data Mover Tool.

With the Data Mover Tool, Analytics Services has helped IBM clients cost effectively migrate their data environments with a high-speed data transfer built specifically for DB2 databases.

Key features

- Ability to selectively migrate tables and time periods of data
- Consistent availability of old and new databases during migration
- Ability to redesign database partition groups, number of partitions, table spaces and page sizes
- Ability to change range partition keys, distribution keys or dimensions of tables to allow re-partitioning or re-clustering of data
- Capacity for a robust auditing solution using the built-in checksum facility

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Analytics Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met.

Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership
- Information sharing through our mentoring approach

Available for any delivery approach, the IBM Analytics Services team will produce results quickly, and will help to put your project on the road to success.
