

IBM Case Manager Discovery and Configure Workshop

Rapid, Agile and Collaborative Solution Prototype

The IBM Case Manager Discover and Configure Workshop is a **3 to 5 day** collaborative journey with a Business Analyst to **design and prototype** an initial solution showcasing the value of case management and rapid/agile application development.

Raise awareness by collaborating with your end users to easily create an initial prototype

- Introduce Business and IT teams to a collaborative agile approach and rapid design.
 - **Demonstrate how to build solutions with the business team, not for them.**
- Jump start enablement on a Case Manager solution design.
 - **Prototype an initial case solution in three to five days!**
- Demonstrate case modeling and rapid outcomes to the business teams.
 - **Show Business Analysts that Case Manager is the tool to more quickly build your case solutions.**
- Initiate a mockup solution in Case Builder.
 - **Walk away with a prototype to showcase to multiple business teams, gain quicker adoption across the enterprise.**
