

IBM Quick Win Pilot for Advanced Case Management

Collaborative, Continuous, and Iterative Case Solutions

The IBM Quick Win Pilot for Advanced Case Management is an IBM-led **10-week delivery project** leading to a successful **initial solution** that establishes an operational platform for **case management** and the associated **content and process capabilities**.

Get your successful start with a Quick Win Pilot (QWP)

- Do you have an immediate/committed go-live date for an identified case/process and are willing to make scope tradeoffs to efficiently build a first iterative release?
 - ***QWP completes in a 10-week time frame!***

- Do you need a dedicated or skilled team to start a case project?
 - ***QWP is led by IBM experts that leverage your client SMEs as needed.***

- Do you want a fast initial project success to showcase and foster support for broader adoption?
 - ***QWP succeeds for you due to defined duration, price, staffing plan, and approach***

- Are you looking for an iterative and agile approach to defining requirements supporting the business' changing needs...*build with the business, not for the business*?
 - ***QWP quickly defines the initial scope (weeks 1-2) and performs stakeholder feedback sessions biweekly.***
