

Information Management, Analytics & Optimization Services

IMS Security Health Check Service Offering

During this focused review, the following areas could be analyzed, based on Client requirements:

- Identify IMS resources that require protection
- Identify the type of protection required for each resource
- Describe the security facilities that are available to protect each of the resources identified
- Identify any exposures in the existing security environment

Duration: 40 to 120 hours, depending on the requested scope.

Highlights

- ***Service from the IMS Laboratory Technical Specialist group***
- ***Detailed analysis of all security related areas***
- ***Findings delivered as paper report including management summary***
- ***Identify any security exposures of the customers IMS environment***

The IMS Security Health Check is a special service offering from the IMS Laboratory Technical Specialist group. This offering is designed to help the client design and implement an effective security strategy.

Implementation Approach and Deliverables

The engagement consists of a five to ten day on-site review which could include interviewing your staff, and ten additional days spent off-site analyzing the information, and preparing a detailed written report of the findings. The report will include issues identified, recommendations, and possible enhancements to consider. The final written report is delivered two to three weeks after the conclusion of the on-site visit.

Requested Client involvement

It would be expected that representatives from a relevant subset of the following groups be available during certain periods of the study:

- IMS application team leaders for identified applications of interest
- IMS DBAs
- IMS System Programmers
- Security Administrators
- Lead problem and change control coordinators

Next Steps

Your first step is to get your initial project up and running and quickly document the current security environment in the IMS area.

Our consultants can assist with both the installation and configuration of the suggested changes. Our consultants will guide your staff through the required steps and in combination with the IMS Security Implementation Service Offering and Temporary Staffing Service Offering a full implementation service for the customers security environment is possible.

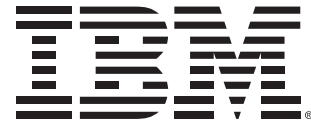

For more information

To learn more about IBM Software Services and this service offering, please contact your local IBM sales representative or send an e-mail to jhook@us.ibm.com.

In addition the manager of the IMS Laboratory Technical Specialist Group will be happy to help.
