

IBM InfoSphere BigInsights Software Services

Build your BigInsights Solution

Highlights:

- Leverage IBM experts to seamlessly install and configure IBM InfoSphere BigInsights QuickStart or Enterprise Edition in your environment
- Get support in defining the right big data architecture that would address your business need
- Accelerate your implementation lifecycle by developing a powerful analytics solutions leveraging the built-in text processing engine and library of annotators

Many companies are seeing dramatic growth in the variety, velocity, and volume of information being generated by their businesses.

Organizations are struggling with how to analyze these vast and diverse data sets and find insights in these new and unconventional data types such as sensor data, web pages, web log files, click-streams, search indexes, text messages, and email etc.

As part of the IBM Big Data Platform, IBM InfoSphere BigInsights enables new solutions that turn large, complex volumes of data into insight, cost effectively. InfoSphere BigInsights delivers an enterprise-ready big data solution by combining Apache Hadoop, including the MapReduce framework and the Hadoop Distributed File Systems (HDFS), with unique technologies and capabilities from across IBM.

What we offer

Our Information Management (IM) Software Services team has a number of services which can accelerate your adoption to this new exciting technology

Architecture and Design Workshop of your Big Data Solution:

Once your team has familiarized themselves with the basics of IBM Big Data technology, our technical experts will guide you in selecting the right use case and designing and planning your first Big Data solution focusing on how to best apply the technology to solve your identified business need.

Installation and Configuration Support of IBM InfoSphere BigInsights QuickStart:

Our technical professionals will support your team in specifying which optional components to install and how to configure your platform. The engagement can be customized to spend more time on different activities depending upon your needs.

InfoSphere BigInsights QuickStart Services:

IBM will work with you in building your first analytical pilot application leveraging the built-in text processing engine and library of annotators. With InfoSphere BigInsights, IBM can support you to quickly query and identify items frequently of interest in documents and messages, including persons, email addresses, street addresses, phone numbers, URLs, joint ventures, alliances, and more.

Custom projects

Our technical resources will support you for example in your integration projects with your existing data warehouse solution or any other type of custom project you may have.

InfoSphere BigInsights Essentials Training

We offer a hands-on training course for system administrators and developers responsible for managing InfoSphere BigInsights with Apache Hadoop, for more information at:
ibm.com/software/data/education/bigdata.html

Benefits

By teaming with IM Services you get access to up-to-date training, best practices and guidelines in this exciting new technology. Our Services experts continue to build and enhance their deployment capabilities delivering business value both efficiently and effectively on a global basis and using their experience to mentor your staff.

When embarking on an IBM InfoSphere BigInsights implementation, the expertise of the IM Services team can facilitate your implementation efforts. Leveraging our expertise will allow you to achieve the business benefits you are striving for in an accelerated, cost effective and low risk manner.

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Information Management Software Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met. Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership
- Information sharing through our mentoring approach

Available for any delivery approach, the IBM Information Management Software Services team will produce results quickly, and will help to put your project on the road to success.
