What is a Package Offering?

Information Management Implementation Packages are fixed scope, fixed-priced services to help IBM clients ensure that they have a technically sound and functional system framework necessary for the successful development and deployment of their Information Management solution.

The InfoSphere Optim Install Package provides the expert resources to install InfoSphere Optim software in a Linux, Unix and Windows (LUW) environment for one system. It also provides hands-on assistance to address questions, recap key issues covered in formal training classes, and to confirm that your systems and resources are ready to begin applying the knowledge gained in class to your business needs and operational requirements.

This package does not include Travel and Living expenses.
