

IBM InfoSphere Optim Query Capture Replay Install Offering

Accelerate your time to value

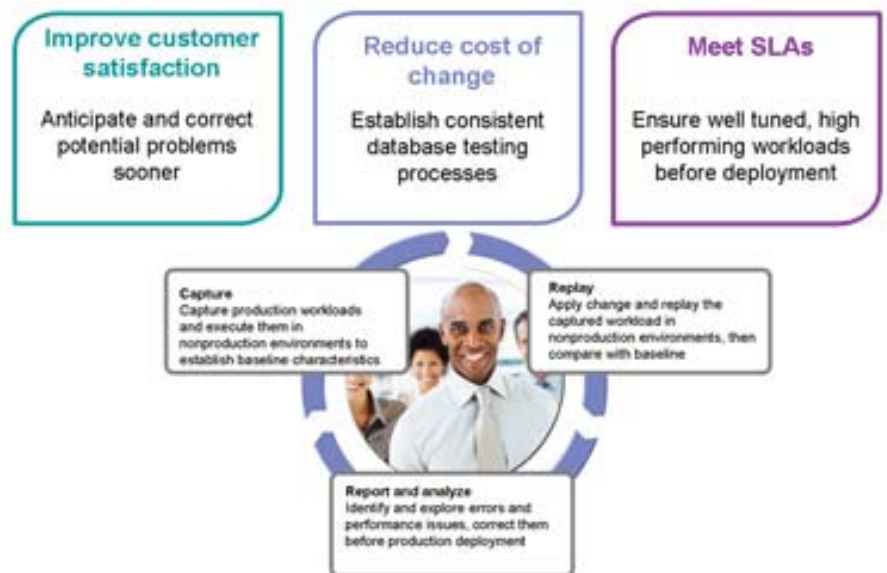

Highlights:

- Work with you to leverage repeatable, proven processes and methodologies to proactively identify and reduce project risks
- Accelerate your time to value and the return on investment of your IBM InfoSphere Optim Query Capture Replay solution
- Leverage IBM expertise to quickly and seamlessly install the InfoSphere Optim Query Capture Replay solution

If there is one constant across today's growing global economy, it is change. These changes are necessary to meet new business requirements but they can be costly, difficult to implement and high risk. However, when change is handled effectively, organizations have an opportunity to accelerate the pace of their product and service delivery. One way to expedite your ability to manage change is to create realistic test scenarios that mimic your production environment and provide you with the confidence that any changes you need to implement will be done seamlessly.

With InfoSphere Optim Query Capture Replay, users can easily capture production workloads and replay them in non-production environments to reproduce the original conditions complete with change impact reports. InfoSphere Optim Query Capture and Re-play is designed help anticipate consequences of change to ensure high performing systems. As a result, InfoSphere Optim Query Capture and Replay allow you to:

Overview

With all of these powerful benefits, you will want to get your InfoSphere Optim Query Capture and Replay solution up and running quickly! And that is exactly what the Install offering is designed to do!

This offering includes:

- The deployment of the InfoSphere Optim Query Capture and Replay from two database sources to one database target
- Installation and configuration of up to three InfoSphere Capture Replay software agents in data server environments of your choice
The following agents are recommended:
 - One to capture workloads in a production environment
 - One to capture workloads in a pre-production environment
 - One to support workload replay in a test environment
- Installation and configuration of one InfoSphere Capture Replay server
- Deployment validation and acceptance testing

In addition, our IBM experts will provide you with an engagement summary report.
