Information Management Software Services
InfoSphere Warehouse Data Migration Offering

Highlights

- *Expedite your data migration to your new DB2, InfoSphere Warehouse or IBM Smart Analytics environment with the IBM Data Mover Tool*

- *Reduce risk by leveraging highly specialized migration expertise*

- *Stimulate usage of the new data warehouse with the new DB2 or InfoSphere Warehouse feature and function by accelerating the data migration process*

To accommodate their growing infrastructures, today's leading organizations require the latest business information systems and migrating to these up-to-date environments cannot compromise day-to-day business operations. Migrations must be done quickly and efficiently.

IBM Information Management Software Services will help you achieve a faster and more cost-efficient database migration process.

InfoSphere Warehouse Data Migration Offering Overview

The InfoSphere Warehouse Data Migration Offering is a service that combines implementation best practices with the power of the IBM Data Mover Tool to give you the fastest data migration while mitigating risk.

Use of the IBM Data Mover Tool provides you with these additional benefits:

- The ability to selectively migrate tables and time periods of data
- Consistent availability of old and new databases during migration
- The ability to redesign partition groups, number of partitions, tablespaces and page sizes
- The ability to change partitioning keys or dimensions of tables to allow re-partitioning or re-clustering of data
- The capacity for a robust auditing solution using the built-in checksum facility, which allowed to maintain accuracy during the transfer.

The InfoSphere Warehouse Data Migration services includes the following activities:

Project Planning
- Review of the project scope and objective
- Review the Pre-Engagement Requirements Checklist
- Review the Data Validation Method, general procedures and finalization of the master list of database objects to migrate
- Creation of the Project Management Schedule

IBM

Data Migration

- Definition of the Migration
- Installation of the IBM Data Mover Tool
- Test of the migration with a sample data set
- Migration of the data – 2 iterations
- Validation of the data after each iteration
- Support for functional testing

Post Migration and Support

- Review of the data migration results and provide information sharing 40 hours of post data migration support that takes place within the first month after the data is migrated

IBM will conclude this service with the delivery of an Engagement Summary report.

Your independence is our greatest success

That is the underlying theme to our delivery approach for the InfoSphere Warehouse Data Migration. We believe that nothing is more important than transferring our knowledge to your organization. This provides you with long-term self-sufficiency through our mentored and parallel working approaches.

Engage Today

With a world-wide team of highly trained services professionals, the IBM Information Management Software Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met.

Our experts are ready to assist your organization with:

- Establishing project goals, expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership

Available for whatever the delivery approach your business requires, the IBM Information Management Software Services team will produce results quickly, and will help to put your project on the road to success.
