

Information Management Software Services

IBM Information Analyzer JumpStart Package Activity Sheet

Package Deliverables

- ***Pre-engagement requirements checklist***
 - ***Summary report of findings***
 - ***Generated rules report & summary***
 - ***Data quality monitoring process and procedure***
 - ***Project completion checklist***
-

As a pre-requisite to delivering the Information Analyzer JumpStart Package, customers must have already installed and configured the Information Analyzer application to connect to one data source. This will be validated following the pre engagement checklist. If the customer has not installed and configured Information Analyzer, they can purchase the InfoSphere Information Server Core + 1 Component Install Package to fulfill this pre-requisite.

This package does not include Travel and Living expenses.

Tasks Involved

T1. Kickoff Meeting

- Review Package Service Description
- Review completed pre-engagement requirements checklist

T2. Initial profiling and analysis

- Perform Column Analysis and Primary and Foreign Key Analysis
- Perform cross-domain analysis
- Create summary report of findings based on Information Analyzer results

T3. Demonstrate data rules for quality analysis and monitoring

- Identify maximum of 10 data rules of varied complexity including cross sources data rules
- Analyze data rules job results and identify data quality issues
- Setup and run the data rule

T4. Review process and procedure for data quality monitoring

- Deliver "Data quality monitoring process and procedure" document
- Provide eight hours of knowledge transfer

T5. Project completion

- Review Project completion checklist

What is a Package Offering?

Information Management Implementation Packages are fixed-scope, fixed-priced services to help IBM clients ensure that they have a technically sound and functional system framework necessary for the successful development and deployment of their Information Management solution.

The **Information Analyzer JumpStart Package** is designed to help you adopt the IBM Information Analyzer tool to analyze and continuously monitor the quality of information in the data stream and learn how to identify when pre-emptive measures are needed to avoid deterioration of the data.

Education Assessment

An Education Assessment is delivered as a part of every IM project to help you validate your team's skills and knowledge and identify any potential skill gaps that may pose a risk to your ongoing projects. For more information on IM training plans, visit: ibm.com/software/data/education/plans.html

Education Enrollment

For course descriptions and instructions on how to enroll, visit the IM Education Web site.
