

Information Management Software Services Oracle to Netezza Migration Offering

With the help of IBM Information Management (IM) Enterprise Data Warehouse (DW) Software Services, clients worldwide have successfully migrated their data warehouse solution for business success.

Overview

By leveraging IBM proven and standardized methodology, we will help you achieve the IBM Netezza Data Warehouse solution's goal of accelerating your data warehouse performance while mitigating the risks normally associated with the migration of a data warehouse.

With the use of best practices and tools, we will speed up the conversion process and minimize downtime. Our on-shore, off-shore model will provide you with the flexibility of a cost effective delivery service.

This offering is comprehensive by managing all of the critical components from the Oracle environment including but not limited to Oracle database objects, packages, stored procedures, functions and ETL routines.

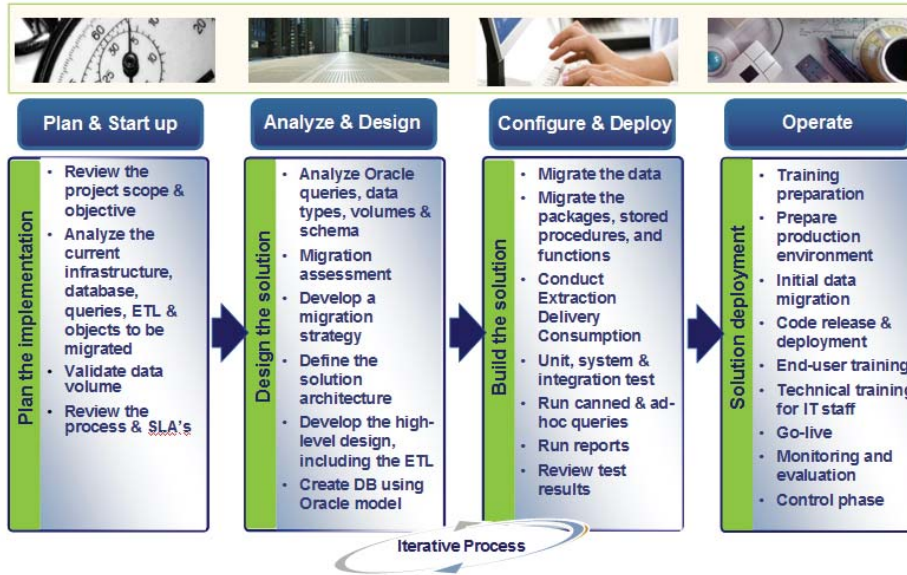

Highlights

- Customized migration process and best practices and tools to reduce cost and speed up the migration process
- Reduce risk and downtime by utilizing IBM's highly specialized migration experts to maximize your IBM Netezza investment
- Leveraging IBM certified professionals with deep product and industry expertise
- Benefit from IBM Worldwide Data Warehouse Netezza Migration "standard practices" methodology

In today's competitive IT market, leading organizations continue to evolve their IT infrastructure, applications and hardware to reduce costs and remain competitive.

IBM Netezza transforms the data warehouse and analytics landscape with a platform built to deliver extreme, industry-leading price-performance with appliance simplicity. It is a new frontier in advanced analytics, with the ability to carry out monumental processing challenges with blazing speed, without barriers or compromises.

Our migration approach:
