IBM PureData System for Analytics QuickStart

Adopt new technology quickly

Highlights:

- Efficiently leverage the power and performance of the PureData System for Analytics platform by gaining knowledge from our experts

- Accelerate the time to value and return on investment with standard practices brought by our experts

- Become self-sufficient and learn how to best administer your solution for future expansion

IBM provides the broadest and most comprehensive portfolio of data warehousing, information management and business analytic software, hardware and solutions to help clients maximize the value of their information assets and discover new insights to enable more effective and faster decisions and optimize their business outcomes. IBM PureData System for Analytics, powered by Netezza®, pioneered the data warehouse appliance space by integrating database, server and storage into a single, easy to manage appliance that requires minimal set-up and ongoing administration while producing faster and more consistent analytic performance.

IBM PureData System for Analytics experts provide the technical leadership and expertise to ensure that IBM PureData System for Analytics technology is appropriately architected, designed, and implemented to meet your business and technology requirements. Our consultants bring their experience in architecting and developing solutions in a large and complex Massively Parallel Processing (MPP) infrastructure to ensure that IBM PureData System for Analytics platform integrates and performs seamlessly into your existing environment.

Overview

The IBM PureData System for Analytics QuickStart service allows for a smooth transition and adoption of this new technology. The objective is to get you up and running quickly with your first deployment of PureData System for Analytics in order to leverage the value of this high performance appliance. This QuickStart is heavily focused on providing you with the knowledge and enablement you need for success. Our consultants will work side-by-side with your team to conduct on-site training and share standard practices to allow your team to quickly and independently maintain your PureData System for Analytics environment.

This QuickStart service includes the following activities:

Project Planning & Analysis:
- Review the project scope, objective and approach
- Deliver a scope, objective and approach document

Setup appliance for application development and administration:
- Setup the PDA appliance for application development and administration
- Conduct knowledge sharing sessions on standard practices
- Document standard practices and lessons learned

Project hand-off and next step recommendations:
- Make recommendations on how to best scale the system for future usage
- Make recommendations on how to best administer for further expansion of the solution
- Conduct knowledge transfer to your team on PureData System for Analytics knowledge base, online help, and technical support
- Provide next step recommendations
- Deliver an engagement summary report and next step recommendations

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Analyics Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met.

Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
