

Information Management Software Services solidDB

Highlights

- ***Harness the extreme speed of solidDB to keep data available and accessible with IBM solidDB Services***
- ***Gain solidDB skills quickly with expert advice and knowledge transfer from IBM solidDB consultants***
- ***Rely on IBM professionals for rapid deployment of new IBM® solidDB™ releases while you focus on critical business issues***

Today's leading organizations require more from their database environments to accommodate growth and minimize expenses. Thousands of customers rely on IBM Software Services, the industry's premier database experts, to help them leverage the extreme speed of solidDB to keep data available and accessible, increasing efficiency while keeping costs down.

IBM solidDB is relational in-memory database software that delivers extreme speed, performing up to ten times faster than conventional databases. Whether deployed as a cache for a traditional relational database or as a stand alone database, IBM solidDB is designed for fast, always-on access to data under high throughput conditions, to satisfy the real-time demands mission critical applications.

What is an IBM solidDB service?

A solidDB service offering is designed to get your organization up and running quickly. This service also offers comprehensive project planning and execution, product education and on-site support. Our consultants offer a range of services from end-to-end project consulting to specific targeted services.

What does IBM Software Services for solidDB offer?

IBM Software Services for solidDB range from end-to-end project consulting to specific targeted services. Services include:

- Installation
- Hands-on mentoring
- Technical assessment
- Proof of concept
- Architecture design
- Design and implementation assistance
- Project mentoring
- Performance analysis
- Database and application migration
- solidDB education

When engaging IBM Software Services, you can be confident that you are working with the industry's leading solidDB experts. Your staff will gain solidDB skills quickly with expert advice and knowledge transfer directly from our experienced consultants.

IBM solidDB Consulting Services

IBM solidDB Consulting Services are designed to offer a full range of options depending on your needs and budget. Whether it is through the full-lifecycle or at specific check points, our experienced consultants will help ensure project success. Consulting services

options include:

- Technical Assessment: identify features and feasibility
- Proof of Concept: determine business value and requirements, establish project scope including benchmarks or prototypes, align deliverables with requirements, and determine resources needed to accelerate the implementation process
- Architecture Design: System architecture design based on the unique capabilities solidDB (High Availability, Cache, Advanced Replication)
- Design and Implementation Assistance: database schema design, application implementation approaches, and integrating IBM solidDB with other tools and/or systems
- Project Mentoring: full life-cycle management of your implementation
- Performance Analysis: analyze a particular performance problem in the system and recommend database tuning/application optimization
- Database and Application Migration: conduct an inventory of the origin and target requirements, create migration scripts, leverage IBM solidDB conversion tools, and perform data and application migrations

IBM solidDB Quick Start

IBM solidDB Quick Start provides dedicated services to ensure successful implementation of the

solidDB product in your particular environment. Tailored packages include installation, configuration and hands-on training customized to your specific needs. IBM solidDB Quick Start includes:

- Installation & configuration of IBM solidDB or IBM solidDB Universal Cache
